

Help prevent wheelchair related falls with D's Locks.

Each time someone transfers in and out of their wheelchair, there is a risk of falling. Some falls result in serious injury that require long term medical care. Often the injury permanently affects one's quality of life.

Nearly half the patients who use wheelchairs in nursing homes have a fall each year. Of those falls, approximately eleven percent result in a serious injury such as a fractured hip. Nationally, falls from wheelchairs cost individuals and businesses billions of dollars each year. This situation can be almost entirely eliminated with D's Locks.

Key Benefits of Wheelchair Locks:

- ▶ Positively locks wheels in place
- ▶ Locks can be engaged and disengaged very easily
- ▶ Handles can be mounted almost anywhere for user convenience
- ▶ Adds no width to most chairs
- ▶ Lightweight
- ▶ Wheel can be removed and replaced when locks are engaged
- ▶ Easy installation
- ▶ Fits most everyday and institutional chairs
- ▶ Builds confidence by reducing fear of falling
- ▶ Reduces probability of increased legal expenses in regard to wheelchair falls
